OTHER PERSONAL DETAILS

PROFILE SUMMARY

With a strong command over front-end and back-end development, as well as a deep understanding of DevOps tools like Git, Kubernetes, and Docker, I am well-suited for the Full Stack Developer role. I bring expertise in modern JavaScript frameworks such as React.js, alongside proficiency in backend technologies like Node.js, .NET Framework, Java, Spring Boot, and Hibernate. This allows me to seamlessly build efficient and scalable web applications from start to finish, making me an asset to any development team.

EDUCATION

2024 — PG-DAC
Centre for Development of Advanced Computing (CDAC)

2022 — B.Tech/B.E.
Sipna College of Engineering and Technology, Amravati

2018 — XIIth
English

2016 — Xth
English

Projects

31 Days — **Explore-ease**

• Explore-ease is a Hotel/Property booking Project which integrates a range of technologies including Spring Boot, Java, React, MySQL, Bootstrap, JavaScript, HTML, CSS and Hibernate

3 Weeks — **Movie Store App Using ASP.NET Core MVC**

This report outlines the implementation of a movie store application using ASP.NET
MVC framework. ASP.NET MVC is a popular design pattern for building web
applications that separates concerns between Model, View, and Controller components. This report will detail the functionalities, structure, and potential benefits of this approach.
Functionalities
The movie store application can provide various functionalities depending on its complexity.

City	Pune
Country	INDIA

HOBBIES

Watching web series, Playing cricket, Travelling

LANGUAGES

- English
